Digital product designer, 11 years — part design lead, part builder. I've led teams through 0→1 products in options trading and real-money gaming, and helped hire designers and grow them within the organisation — a proven track record of shipping work that moves revenue and retention. The builder never left: I still design hands-on and ship my own products, most recently **Nudge** and **Levels**, built solo with AI.

Experience

Capmint - Lead Product Designer

(Sep 2025 - Present)

- **Led a team of 3 designers** while staying hands-on as lead IC, taking CapMint's web terminal and mobile apps from 0→1.
- **Designed Strategy Builder,** a goal-first options workbench — state an outcome, get real strikes, reshape by dragging the payoff chart. Retention improved from 16% to 18%.
- **Designed Mint Insights for mobile** — Patterns diagnoses technique against an Edge metric, Performance reports money against ROC, each costly habit priced in edge.

Gameskraft - Lead Product Designer

(May 2021 - Sep 2025)

As a manager

- **Led a team of six**, overseeing task allocation, design reviews, feedback, and individual growth to ensure project success while driving the design of products that generate ₹500 Crore in monthly revenue through user research, data analysis, and a user-first approach.

  Team - Abhijeet | Kshitij | Shivangi | Revati | Rahul | Rajat
- **Facilitated collaboration** with internal and external stakeholders to resolve conflicts, build alignment, and develop strategies that drove unified goals.
- **Helped grow the design team** from 4 people in 2022 to 12 by 2025, hiring and onboarding 15 designers and building a strong, collaborative culture.
- **Streamlined** the product design workflow by setting up Jira tracking, giving the team clear visibility and structured collaboration.
- **Mentored designers through regular 1:1s**, helping them grow and get promoted, and conducted the team's appraisal cycles.

Individual contribution

- **Designed a robust tournament format** to boost user growth and engagement, ultimately driving ARPU more effectively.
- **Helped design the "Help Center"** feature within the Tenet product for Rummy players, reducing support call volume while creating a more supportive player experience.

MPL (Mobile Premier League) - Senior Product Designer

(Nov 2019 - Feb 2021)

Worked on a **0→1 social fantasy app**, designing and building the "Team Trading" feature to enhance user engagement.

FabHotels - Product Designer

(October 2017 - August 2019)

Designed for both sides of the business — the consumer booking products and the **B2B hotelier platform** for hotel partners — creating seamless experiences across the products.

Freelance Designer

(July 2015 - August 2017)

Worked with design teams at startups such as **Askme, Shuttl, and OverKart**, contributing to product design initiatives that supported their business growth and strategic goals.

MobiKwik - Visual Designer

(Apr 2014 - June 2015)

Started my design journey here.

Leadership

- Hiring & onboarding
- Design reviews & critique
- Feedback & career growth
- Design process (Jira)
- Stakeholder alignment

Skills

- Designing & building with AI
- Information Architecture
- Prototyping
- Visual Design
- User Research
- Usability Testing

Platform Experience

- Android
- iOS
- Website
- PWA

Personal Note

A proud cat dad to Eva 🐈 (3 years old) and a lifelong learner at heart. Beyond design, I dive into books on finance, life, history, and science, and love exploring new places whenever I can.

Education

Ravenshaw University

B.Sc., Information Technology
